

LOW IgG LEVELS PUT 2 OF 10 NEWBORNS IN A RACE AGAINST TIME.

THE NEW FOALCHEK® DIAGNOSTIC KIT GIVES YOU FAST ANSWERS.

Time has always been the top concern when dealing with the question of failure of passive transfer in foals. The most effective treatments are those that are immediate—yet IgG testing procedures currently require up to a day of lab time to produce results.

Now that delay has been eliminated. For the first time, there is an animal-side agglutination test that accurately and conveniently identifies both the presence and the level of maternal antibodies in foals. It's called the FOALCHEK® Diagnostic Equine Immunoglobulin G Test Kit.

FOALCHEK DETECTS FOALS UNPROTECTED BY COLOSTRAL ANTIBODIES.

As you know, even partial

failure of passive transfer leaves a foal lacking immunities indispensable to the maintenance of good health. Research has shown that more than 20% of newborns are afflicted to some degree.* Those left untreated must face a myriad of potentially pathogenic invaders with no protection. FOALCHEK can spell the difference between successful treatment and unfortunate circumstances.

FOALCHEK REDUCES TESTING TIME TO INCREASE TREATMENT OPTIONS.

Unlike other immunodeficiency tests, *FOALCHEK can be used with whole blood*. Not just serum. That means you can test on the spot, administer colostrum, and test again. And that means a greatly improved

chance of correcting the deficiency before time makes transfusion your only alternative.

FOALCHEK IS SIMPLE TO USE AND SIMPLE TO INTERPRET.

FOALCHEK is a fast, accurate latex agglutination test. The completely equipped kit—with easy-to-follow instructions—yields clear, concise readings of IgG levels.

FOALCHEK IS AVAILABLE TODAY.

So act now. Tomorrow, you may be faced with a clear case of immunodeficiency due to pre-lactation, lack of or insufficient colostral antibodies ingestion, or a foal which may have already undergone gut closure. At that time, you'll need fast answers, not unanswered questions.

You'll need FOALCHEK.

*Research results available upon request.

It is important to read procedure and package insert for complete directions and information.
